PICK-UP MULCHER

SMO PICK-UP

MINIFORST PICK-UP

HANDLING PRUNINGS

Certain crops produce very high quantities of prunings. This can cause big problems when it is time to mulch them. Burning is always bad for the environment. The MINIFORST pick-up provides a perfect solution – picking up the prunings with a pick up reel at ground level and, if needed, reinforcing the feed into the machine with an optional top reel. The prunings are then processed within a screen to produce a fine and uniform mulch.

You don't need to remove prunings anymore. When you use a SEPPi pick-up mulcher it will be mulched finely, through a fine mulching grid. This results in a fast biodegradation, within one season.

A modular system makes the standard mulcher to a pick-up model ▶

SMO PICK-UP

SMO pick-up is used in vineyards, in orchards and olive groves, it mulches material up to 7 cm in diameter. This mulcher works rocky and uneven terrains; with the fine mulch grid the result of the cutted material is finely and homogeneously.

features	SMO pick-up
mulches grass and prunings up to working speed	7 cm [2.8"] Ø 3-5 km/h
ISO 3-point linkage	cat. 1 & 2 rear or front or reverse/pushed
gearbox with freewheel and through shaft	540 rpm OPT 018: 1000 rpm
gearbox 540 rpm with automatic inverter and double freewheel for reversible tractors	OPT 066
modular lower pick up kit for material feed with grid including rotor	S
pressure gauge and flow control	S
support roller, adjustable in height	5 cm
rubber gauge wheels	OPT 035
protection	with chains
rotor with SMO flails	S

S: standard - OPT: option

Manage large quantities of prunings easily

The MINIFORST pick-up is particularly suitable for cultivations with very thick and bulky wood, like olive and citrus.

- it collects and mulches finely 100% of the prunings in one single pass
- long hammer lifetime;
- prunings are lifted from the ground and processed through a screen; therefore no contact between the hammers and stones.

2 machines in 1:

- 1) forestry mulcher to mulch grass, brush and wood up to 12 cm [4,7"] in diameter, for conventional use
- 2) pick-up mulcher, with power feed to mulch dense rows of prunings up to 25 cm [10"] in diameter

features	MINIFORST pick-up
mulches wood up to	25 cm [10"] Ø
working speed	0-5 km/h
rear central fixed ISO 3-point linkage	cat. 2 for pushed machine only
front attachment	OPT 101
gearbox with freewheel and through shaft	540 rpm OPT 018: 1000 rpm
pressure gauge and flow control	S
pick-up kit for material feed with grid incl. rotor	S
skids (for use without pick-up device)	OPT 045
upper pick-up rotor	OPT 223
hydraulic hood	S
skids and support roller	S
rubber gauge wheels	OPT 035
front and rear protection	chains
rotor with SMO flails	S
forestry rotor with swinging hammers	OPT 240
forestry rotor w. tungsten tipped swing. hammers	OPT 193

S: standard - OPT: option

pressure gauge for easy control of the pick-up rotor

skids for a use without pick-up device (option)

The Advantage of High Quality

Mulching Equipment Pioneers

Founded in 1939 by Max Seppi, SEPPI M. is now one of the foremost manufacturer in its sector - not only in Europe, but worldwide. A pioneer like no other, SEPPI has been manufacturing mulching equipment for more than 40 years. SEPPI's mission is "To improve the professional's work through innovative and efficient solutions".

The many years of experience, together with the tireless research for more advanced technologies and more resistant materials result in the premium quality of the SEPPI equipment with tough machines that are reliable even under extreme working conditions.

The biggest gratification over the past 70 years has been our satisfied customers, who have benefitted from long and efficient work with the SEPPI equipment – a continuous motivation to keep on focusing on high quality! The family-based character of the company today being led by the third generation, stands for fair and responsible business relationships.

Discover the many advantages of owning SEPPI equipment!
